

## McBEAN BROS.

45 1/2 Grain Exchange Bldg., Winnipeg

Ship your grain to the old reliable grain and be assured of satisfactory returns. Every car given individual attention. Liberal advances. Prompt returns. All premiums given to shippers.

REFERENCE: BANK OF NOVA SCOTIA

Established 1882

August, 1926.

## Now Spores Can't Taint Your Butter

Spores are the arch enemies of butter. They attack the wraps even before they are used, and rob the butter of its greatest quality—flavour.

Appleford wraps give double protection against spores. First they are made absolutely grease-proof. Secondly, they are shipped in mould-proof packages which protect the wraps until they are actually used. This is an exclusive Appleford feature.

## Tolerance

Some years ago that master craftsman among movie picture directors, D. W. Griffith, conceived and produced a great spectacular film play under the title "Intolerance." Like other Griffith productions, it was not only a wonderful and entertaining picture, but it sought to teach a great lesson. It depicted in a convincing manner the wrongs inflicted upon humanity at different stages of the world's history as a result of the intolerant views held by those in power for the time being.

Unquestionably, with the growth of education and a more widespread enlightenment of people, there is a lessening of bigotry and a larger degree of toleration in the world today than ever before in its history, and, it is a matter of rejoicing to know this spirit is developing. Nevertheless, there is plenty of room for a still greater development of this spirit not only in international relations, but within the bounds of each individual nation.

With another general election pending in Canada it is perhaps timely to urge the necessity for a platform of a more tolerant and progressive political party. As individuals, we may differ on points of constitutional law, but that is no reason why one person or group should dominate those who do not see eye to eye with them as didaylith to Canada or the Empire. East and West may hold opposite opinions on the subject of the tariff, and both be perfectly honest and sincere in their views, but such difference of opinion surely provides no reason why the West should jnounce the East as destined of bleeding the West white, or for the East to accuse the West as selfish and ready to ruin all Eastern industry. Unity of opinion on such a controversial question is impossible, but it is possible that there be, and there should be, a tolerant attitude and a respect for each other's views.

A spirit of tolerance should characterize the adherents of every religious denomination, yet, as all too frequently the reverse is true and the narrow, bigoted and bitter intolerance is displayed. In this, however, it is pleasing to see that the old racial and religious antagonisms of India, which for many years past have been displaced and dissolved Canada has scarcely passed away. Today in our own country as well as elsewhere danger seems to lie in the words warfare between the Fundamentalists and the Modernists. By all means let there be full discussion and debate. Only so will the full truth be disclosed and established, but in it all let there be charity and tolerance.

It is well to remember that intolerance and bigotry are by no means confined to religious and political. As Dr. Frank Glean, head of the University of Wisconsin, and former editor of The Century Magazine, recently pointed out, they are bigots of fashion, bigots of the Century, bigots of science, bigots of business, bigots of journalism, bigots of medicine, bigots of theology, bigots of reform. Each and every one of them is dangerous, and every one of them does real damage to the cause of truth.

There is a very real need for a constant preaching of the gospel of tolerance, a way must be found for combating the still too prevalent tendency on the part of many people to adopt an intolerant attitude towards all people and all questions with whom or which they are not in agreement. This "I alone am right, and you are wrong and must therefore be suppressed" attitude is the cause of more heart-burnings and community quarrels than almost any other one thing in our present-day civilization.

Intolerance, nothing else, has split many a village and small town into factions not only to the detriment of each and every individual, but to such an extent that all community spirit and enterprise has been killed. And, after all, it is the most futile and nonsensical of human weaknesses. On the other hand, respect for other people's opinions, the encouragement of a spirit of charitableness, makes for peace, happiness and contentment in the home, helpful co-operation in community life and effort, and the strength and unity in the nation. Intolerance abates at the expense of all else, but truth can not be suppressed. The mighty and will prevail, and all that intolerance in thought and action can accomplish is to create ill-will and discord and thus retard the onward march of progress and achievement.

When the young man counts an heiress he thinks his fortune is made.

## Western Fisheries

Big Shipments of Fish From Lakes of Northern Alberta

The fishing season opens again on August 15 on Lesser Slave Lake and Lake La Biche. There is approximately 100,000 pounds of white fish to be shipped during the season from Lake La Biche and over half a million pounds from Lesser Slave Lake as well as a considerable quantity of jackfish and whitefish. The fish are packed in average quality and are to be frozen at Edmton and at the present time there are about four cars of fish per week being shipped from the smaller lakes in the vicinity of this point. A movement is on foot to operate fisheries on Lake Athabasca, the larger part of the catch on which will be frozen at Waterways and shipped.

The early, fly that falls into the boarding-house milk pitcher is reasonably sure to find a watery grave.

"I miss my Swiss," sighed the 34-pound lady, whose diet included the exclusion of all forms of cheese.

This will quickly offend the diarrhoea, vomiting and purging, and, perhaps save the baby's life.

## Assisted Immigration

8,493 Immigrants From Britain During First Five Months of This Year

According to report from London the Dominion's secretary reports that the sailings for Canada under each of the assisted passage schemes during the first five months of the present year are as follows: Government scheme: Nominalized persons, 3,227; household workers, 1,094; juveniles, 14 to 17 years, 461; 3,000 family scheme, 3,901; total, 12,582. Other schemes: Society of Overseas Settlement of British Women, 53; British Dominions Emigration Society, 210; grand total 8,192.

Marked activity in the movement of settlers from the United States to Canada is noted by the department of immigration and colonization. In the month of June the Canadian Government agency at Fargo, North Dakota was instrumental in moving to Canada 192 settlers who with their wives and families had been granted 312 people, and brought with them cash and effects valued at \$495,550. These newcomers were almost entirely from North Dakota and Minnesota and were destined for points in the prairie provinces and British Columbia.

## Common Sound Explained

Puffing of Railway Engine Regulated By Driving Wheels

The puffing of a railway engine is a common sight, but few people know by what means it is regulated. By a locomotive in the course of a journey the number of puffs is determined by the distance of the driving wheels.

No matter what the speed of the train may be, the engine will give four puffs for every complete turn of the driving wheels. The wheels may vary in circumference, but the average is 20 feet.

With average driving wheels and a speed of fifty miles per hour, there will be given 800 puffs a minute, or 52,800 puffs an hour, the driving wheels performing 12,300 complete revolutions in the sixty minutes.

## CHOLERA INFANTUM

Cholera in Infants A King Over Pain

Those who seek permanent relief from the grinding pain of Cholera in Infants should read the letter of E. F. Norman, from Georgetown, who writes:

"I was truly critical with strong joints and Rickets when Nervilite must have been what I needed, because it cleared up my trouble quickly."

"If you need a reliable, strong, pain-relieving pain remedy, one you can depend on, get a 35c bottle of Nervilite to day; it will make you well quickly.

"The next weekend habit of enjoyment of the sea-bath and sea-bathing, cheap exercise and extended travel, annual holidays and vacation is called the emancipation of people are bringing an enormous effect on personal and public health."

"I decided he decided."

Other things making for improvement in public health, Sir George noted, were an increase in sobriety, more sensible eating, more windows, more tooth brushes and greater simplicity in dress.

Complete in itself, Nervilite, Grasshopper Plague in Russia

State of Siege Proclaimed in War on Insect Pest

To protect Russia from the spreading grasshopper plague, the district of Stavropol has proclaimed a state of siege, and has triumvirates of local dictators who are to be held responsible for waging a successful war on the insects which are endangering the country.

Cavars and aeroplanes have been used to spray sand and carbids of poison, revolutionized. Moreover, while the entire peasant population has enlisted in army-like formation, under orders of self-selected officers, to hunt in the harvest before grasshoppers destroy the products.

Asthma Can Be Cured. It's suffering is as needless as it is terrible to endure. If you have asthma, and are one of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy.

Cavars and aeroplanes have been used to spray sand and carbids of poison, revolutionized. Moreover,

while the entire peasant population was almost entirely with the British empire, the amount for the empire being \$392,631,819 and for London \$116,705,299.

At the end of March, 1926, Canada's favorable trade balance was almost entirely with the British empire, the amount for the empire being \$392,631,819 and for London \$116,705,299.

The favorable balance of trade with the United States amounted to \$123,976.

\$34 was approximately compensated for by a favorable balance with other foreign countries.

Earliest Postmarks

C. R. Lewis, of Liverpool, said that the first known provincial postmark was on a letter marked "Washington," posted in 1792, in the days before adhesive stamps. The earliest known postmark in Canada is that of the circular type, with town and date marked in the circle, was on a Chester letter of March 23, 1894.

## CANADA'S ENVIRY POSITION

Largest Trade Balance Per Capita Of Any Country in the World

Canada now has the largest favorable trade balance per capita of any country in the world. For the fiscal year 1926 Canada's favorable trade balance amounted to \$101,134,405, an increase over the previous year of \$116,705,299.

At the end of March, 1926, Canada's favorable trade balance was almost entirely with the British empire, the amount for the empire being \$392,631,819 and for London \$116,705,299.

The favorable balance of trade with the United States amounted to \$123,976.

\$34 was approximately compensated for by a favorable balance with other foreign countries.

WILL PURCHASE ELEVATORS

To serve points in the province which are not at present served by the pool or the U.G.C. elevators, the wheat pool board has decided to build or buy an once elevators at thirty Alberta points.

The volume of wheat handled is the basis upon which the selection of points has been made.

BIG FARM LAND DEAL

One of the largest farm land deals of recent years in Central Alberta was consummated recently when the Kilan stock farm, consisting of 960 acres about 13 miles from Camrose, was sold to Dr. H. G. Berry of Mt. Clemens, Michigan.

There is no room for the man who refuses to let his friends tend him money.

## DOMINIONS AS INDEPENDENT AS MOTHER COUNTRY

London.—"The Labor party last week heard Right Hon. L. C. M. Amer, secretary of state for the dominions, answer a question regarding the constitutional difficulty in Canada to its satisfaction, and I feel that he expressed the attitude of every party on the house." In this manner J. H. Thomas, Labor member for Derby, prefaced a speech with which he opened a debate on dominion-colonial relations in the House of Commons. Mr. Thomas said he wished to avail himself of the opportunity because general elections were pending in Canada and he desired to let the world what Great Britain meant by self-government and also to emphasize that whatever advice Governor-General Byng gave during the parliamentary crisis in Canada was given on his own responsibility. He declared the decision was given by the governor-general on the strength of the "spot knowledge" he had had of the situation and stressed that there had been no interference from Downing Street.

The Labor member said that, "with more amendment than interest," he had read a suggestion in an American newspaper that, owing to the wicked action of the British Government, Canada should free herself from the tyranny of Downing Street. The paper had also suggested that Canada be handed over to the United States on the terms of cancelling Great Britain's war debt to that country, and Mr. Thomas held this to show how some people did not attempt to understand the mentality and meaning of the British Empire.

With reference to the imperial conference, which Parliament adjourned in the commons, when it met on October 19, two weeks later than the date first set, Mr. Thomas expressed the hope that not only the representatives of governments, but also oppositions would be invited. Thus, he pointed out, party spirit would be eliminated and a greater continuity of policy would be secured.

Nothing in the nature of debate occurred on this part of Mr. Thomas' speech, but Lieut.-Col. Amer, secretary for the dominions, in the course of his reply, implied that half of the government emphasized that the dominions were just as independent as the Mother Country. The character of their independence was the same as the British, only qualified by self-imposed responsibilities of mutual loyalty and co-operation.

## Gives Reason For Coal Strike

England Returned Too Soon to Gold Standard—Beaverbrook Sailed on White Star Liner Majestic for Canada via New York. In a long article printed over his signature in the Daily Express on the eve of his departure he declared the failure of the recent proposition for the purchase of the White Star line by the British shipping industry was due entirely to the British official policy of maintaining the gold standard. He intimated that the proposal to trade for 6,000,000 pounds from Britain to the U. S. for the purchase of this line was opposed by the British financial authorities on the ground that it would depress the value of the pound in New York and hamper the present exchange conditions. He also argues that the coal strike is a direct result of the early return of the gold standard as this reduced the cost of selling coal in foreign countries so that the cost of production at home had to be lowered in order to keep up the possibility of competition in the world market.

## U. S. Starts Gold Movement

Premium On Canadian Dollar Makes Export Profitable

New York.—A movement of gold from New York to Canada was started with a shipment of \$1,000,000 made by the J. Henry Schroeder Banking Company.

The shipment was said to represent purely an exchange transaction as the premium on Canadian dollars has risen to the point where the export of gold from this country is profitable.

Canadian exchange is quoted at a premium of thirteen sixteenths of one per cent, which is a shade above the gold shipping point.

The present strength in Canadian exchange is attributed directly to the heavy financing which has been done recently in the New York market in behalf of industries in Canada.

## Loss in Florida Storms

Property Damage Is Estimated To Run Into Millions

Jacksonville, Fla.—Reports of damage where the storm had passed came in yesterday. Wire facilities were slowly repaired. A message from Nassau via Miami fixed the damage there at \$5,000,000.

A message received by the Mountain Line in New York from the steamer Munasir, at Nassau, said that place was wrecked by the hurricane.

Miami's damage was principally to the Avocado pear crop. Palm Beach's playground suffered heaviest damage in the loss of more than a score of houses and small craft which went down when the waves came.

Daytona Beach experienced damage to light and power lines, damaged telephone service, uprooted trees, washed out highways, broken beach concessions and damaged small pleasure craft. After a night without lights, the power service was restored.

A run racing vessel was reported ashore several miles north of Ormond.

The storm took only two lives as it passed up the Florida coast, but it caused property damage to the tune of millions, for Palm Beach's loss was estimated at \$1,000,000, that of Stuart, Fla., at \$250,000 and Miami's at \$100,000. In addition to damage to shipping, telegraph and telephone wires and crops at scores of places.

## Complaint Against New Settlement Act

### Union Members in British House Say Act Is Failure

London.—Complaints that the present settlement act is a failure, coupled with the suggestion that the same for the next year for the assistance of industry should be carried forward annually for the same purpose and not returned to the consolidated fund, which cannot further be drawn upon, were made in parliament by Unibon members from Lancashire and Cheshire. The complainants assert that the greater part of the £9,000,000 which has been provided by the settlement act during the last three years has not been used to the present regulations is now so long delayed.

They also declare that the clause providing for Dominion contributions is acting as a check upon unemployment because of the conditions imposed by the various dominions. They suggest that a portion of the fund provided by the British Government should be utilized without reference to the dominions' contribution overseas.

## Asks Canada's Co-operation

### British Government Asks Aid in "War" On Rum Runners

London.—Canada will be asked by the British Government to co-operate to the fullest extent in the fulfillment of the agreement between Great Britain and the United States to facilitate the control of rum-running. As a result of the joint action of Andrews, chief American prohibition officer, details of co-operation between British and American authorities in this connection have been arranged. Canada is not directly affected by the main part of the agreement which is directed toward the Bahamas from which a vast flood of the prohibited fluid has been pouring into the Southern States. An effort will be made, however, to prevent the illegal use of the flag by rum-runners who are not of British origin, and it is believed that Canadian authorities will be able to help along the enforcement efforts in this direction.

## French Kill Syrian Tribesmen

### Many Prisoners Taken in Fighting Around Ghouta

Beirut, Syria.—Several hundred dissident tribesmen have been killed by the French and more than 300 prisoners taken in fighting around the oasis of Ghouta, according to a general staff communiqué.

The French statement charges that two aviators who were forced by engine trouble to land in the midst of their enemies were wounded and then fastened to their plane and burned.

### Witnesses to Hang

Baltimore, Md.—Governor Albert C. Ritchie refused to commute to life imprisonment the death sentence of Richard Reese Whitemore, gang leader and slayer of a Maryland pensionary guard. He will be hanged August 13.

### Royal Tomb Violated

Orléans, France.—Thieves have violated the sepulchre of King Louis XI, at Clery, carrying off precious gold and jewelled châches, and reliquaries to the value of more than \$100,000.

## Has Allayed Fears Of British Authorities

### Cannot Contract Foot and Mouth Disease From Masts Says Doctor

The Hague, Holland.—There is no danger of foot and mouth disease being contracted through the use of meat of animals affected by the disease during the quarantine period, according to Dr. Laurens, director of the Institute of the Ministry of Agriculture.

As a result of Dr. Laurens' experiments, Dr. Kan, minister of the interior and agriculture, has asked the director of the Institute and Dr. Berg, director of veterinary service, to confer with the British authorities with a view to allaying the fears of the latter with regard to infections in animals affected, by foot and mouth disease.

## Wives Must Remain At Home

### Australia Expects British Parliamentarians to Make Trip Alone

London.—Australia is set against wives. When the Australian cricket team sailed for Great Britain, the Australian cricket board of control put a ban on wives accompanying the men of the team.

And now the Australian branch of the Executive Protection Association has advised British parliamentarians that they are soon to visit Australia that they are not expected to be accompanied by their wives.

J. H. Thomas and several of the other members of parliament have refused to make the trip because their wives are barred.

## SAYS NOTHING SUPPRESSED IN DUNCAN REPORT

### Montreal Star Carries the Following Ottawa Special: "It is the opinion of the discussion of the political situation in the newspapers as to the European war on investigations into the customs department and some conflicting allegations that are made by Inspector Walter Duncan, special investigating officer, was asked for a clarifying statement as to whether anything was suppressed, and if so what it was."

"I was detailed," he said, "to make an investigation into the administration of the customs service in Montreal and that district, and I did so, seized papers and documents in the office of J. E. A. Blasillan, chief revenue officer of the district, and presented them to the chief of police, who I thought, was in position to throw light on the question." The evidence was taken and transcribed, submitted first an interim report and afterwards a final report. Both of these reports were produced before the committee of the house that investigated the customs department and were read into the record of the inquiry. Nothing that contained was suppressed or deleted, but the evidence, comprising 319 pages, upon which the report was based, was not read into the record, although it was tabled in the house. The exhibits were also tabled.

"What I did not produce before the committee and what was not published was a memorandum book to a certain woman. The notes in the book were in shorthand. I had them and it is believed that Canadian authorities will be able to help along the enforcement efforts in this direction.

## MANITOBA POOL FAVORS BUYING OF ELEVATORS

### Department of Agriculture Trying to Raise Sugar Beets

Anchorage, Alaska.—An experiment in raising sugar beets will be made in Alaska.

The department of agriculture and the Alaska railroad will co-operate in this experiment which will be made in the Moosepus and Tanana valleys north of here. Cost of production and quality of product will largely determine the future of the venture.

**Mine Trouble in Cape Breton**  
Glace Bay, N.S.—The trouble at the collieries as a result of the United Mineworkers' members refusal to recognize the members of the One Big Union is spreading. In addition to No. 16, which has been up since Monday night, the Florence Colliery at Sidney Mines is closed down and the Princess is working with reduced force. It is feared that the struggle will become general.

**Biscuit Plant**  
London, Ont.—The Canadian Biscuit Company announces the outright purchase of the D. S. Perrin Company, Limited, manufacturers of biscuits and confectionery.

## More Highlanders for Canada

Scotland continues to pour off her best into the Dominion and specially the attraction seems to be the west.

There is not a Canadian Pacific liner that sails the Atlantic but brings its quota, and usually a pretty large quota, of bonnie Scots lasses and scatty Scots lasses to Canada and they are all as welcome as the flowers in May. Here is a particularly bright

## GOVERNMENT TO DECLARE WAR ON BOOTLEGGERS

### Modified Services

#### Will Not Be Complete Suspension of Religious Services in Mexico

Mexico City.—The Archibishop issued a statement declaring that the withdrawal of the priests from the churches on August 1, as announced in the recent pastoral letter, does not mean complete suspension of religious services.

The services suspended will be holy communion, confirmation, consecration, and some sacraments which require the intervention of priests. Services which can be continued without the intervention of priests will be considered equivalent to the confession necessary for baptism and marriage sacraments.

It is also announced by the archbishop that during the recess of the priests' activities a silence and of repose on the part of a Mass can Catholic will be considered equivalent to the confession necessary for baptism and marriage sacraments.

**Re-Draft Petroleum Laws**  
Edmonton—Revised rules and regulations in respect to oil and gas leases in all parts of the province have been prepared by the Alberta Government, but will not be put into force for the time being. The re-drafting of the petroleum laws in respect to oil and gas leases in all classes of lands will be undertaken some months ago when the probe has shown the liquor traffic to be almost entirely in the hands of foreigners.

## Phillipines Import

### Wheat Flour

#### Bread is Taking Place of Rice As Food

Manila, P. I.—Consumption of wheat flour in the Phillipines has increased in the last few years. Figures of the bureau of commerce and industry show that although rice is the chief food of the Phillipines are using bread as a supplementary food and in some cases as their principal article of diet.

Wheat importations last year were 76,000 tons as compared with 45,000 tons in 1921. Four-fifths came from the United States.

## New Industry For Alaska

### Department of Agriculture Trying to Raise Sugar Beets

Anchorage, Alaska.—An experiment in raising sugar beets will be made in Alaska.

The department of agriculture and the Alaska railroad will co-operate in this experiment which will be made in the Moosepus and Tanana valleys north of here. Cost of production and quality of product will largely determine the future of the venture.

**Miner Troubles in Cape Breton**  
Glace Bay, N.S.—The trouble at the collieries as a result of the United Mineworkers' members refusal to recognize the members of the One Big Union is spreading. In addition to No. 16, which has been up since Monday night, the Florence Colliery at Sidney Mines is closed down and the Princess is working with reduced force. It is feared that the struggle will become general.

**Biscuit Plant**  
London, Ont.—The Canadian Biscuit Company announces the outright purchase of the D. S. Perrin Company, Limited, manufacturers of biscuits and confectionery.

**Brandson, Mass.—** Endorsement of the action of the board of directors in closing the office of the United Grain Growers, Limited, to form a joint holding company to operate a pool of grain growers' and pool elevators and a resolution in favor of buying or leasing United Grain Grower elevators in Manitoba were features of the annual meeting of delegates to the Manitoba Wheat Pool here.

These resolutions, passed with only four dissentients, followed upon a general discussion of the section of the report of the board of directors dealing with elevator operations.

The failure of United Grain Growers, Limited, and the Alberta pool, to agree with regard to the management of a joint elevator holding company was brought before the meeting and a telegram was read from R. O. German, secretary of the Alberta pool, stating that following the breakdown of negotiations between the Alberta pool and the United Grain Growers, the pool had notified United Grain Growers to purchase their elevators in Alberta and had appointed a committee to carry on negotiations for this purpose.

Pool grain was handled at a cost of 128 cents per bushel this year, according to the interim financial statement presented by the pool shareholders, auditors, Miller, McDonald and Company.

**Increased C.P.R. Earnings**  
Montreal.—The statement of earnings and expenses of the Canadian Pacific Railway for the month of June, 1926, shows an increase in net profits of \$12,426,653.89 over the corresponding month last year, and for the six months ended June 30, 1926, an increase of \$16,189,041 over the first six months of 1925.

**Durkin Gets 35 Years**  
Chicago, Ill.—John J. Durkin, sheik of the mob, who shot Edwin Shanahan, a federal agent, was sentenced to thirty-five years in Joliet penitentiary after a motion for a new trial had been overruled. A jury had fixed the punishment.

**Federal Nominations**

Winnipeg.—A. A. Heaps, who, along with W. S. Woodworth, represented the Liberal party in the last house, was nominated in the North Winnipeg constituency in the forthcoming federal election, at a meeting of the independent Labor party.

Brandon, Man.—David W. Beaher, Conservative, to oppose Robert Forke, Progressive.

Nanaimo, B.C.—C. H. O'Halloran, Liberal.

## Mining Industry Bill Passed

London.—The House of Commons

passed the third reading of the government's mining industry bill, which provides for the re-organization of that industry.

The vote was 312 to 125.

## RUM RUNNERS WILL BE SUBJECT TO INCOME TAX

Toronto.—A dispatch to the Globe from Windsor, Ontario, says:

"Liquor dealers who technically describe themselves as 'exporters' were staggered after they had digested the full import of the privy council's decision in the now famous Clegg Smith case, by terms of which Smith must pay to the Federal Government \$28,830 as tax upon his profits from liquor in 1920-21."

"The ruling of the highest tribunal in the empire decided a test case filed by the Canadian Government to determine whether it is within the power of the federal government to tax profits made from liquor sales."

"According to local barristers, who have followed closely the progress of the case through various courts, another border cities' exporter, who is rated as worth more than an average millionaire, and whose operations were the most extensive of any along the border here, will be compelled to hand to the government approximately \$200,000 in income tax, representing his gross profits during the 1920-21 period."

"According to the local experts, who are said to have made large fortunes and who will be assessed by the government for a large share of their earnings—the names being on file in the department of finance at Ottawa pending the outcome of the Smith case, the total will be far in excess of \$1,000,000."

## Dr. Michael Clark Is Dead

Well-Known Western Parliamentarian Passes Away

Calgary.—Dr. Michael Clark, pleader, orator, parliamentarian and writer, died suddenly at his farm home at Olds after a brief illness. A few days ago he declined to speak at a Red Deer Liberal convention, because of his health, but no person thought then that his condition was so serious. His death was caused by a heart attack. His wife pre-deceased him by only a few weeks.

Dr. Clark came to Canada in 1902. His first appearance in public was at the Alberta Liberal convention in Calgary immediately after the creation of the province in 1905. He came to the convention quite unknown and was one of the interesting incidents at the meeting. He was a candidate for the riding of Moose Jaw in the first provincial election in 1905, but met defeat by a narrow majority. He was elected to the Federal Parliament for the riding of Red Deer in 1911 and 1917. He took a very active part in the debate on reciprocity in the session of 1911 and in the discussion on the Borden naval legislation in 1912. He anticipated the unionist movement some time before the Unionist Government was formed, and gave up opposition in 1912. He was a member of the Unionist Government, but although supporting the move, asked to be excused. At the conclusion of the war, he joined with Mr. Clegg in 1919 and was second in command of the Progressive party. In 1921 when the U.P.A. adopted as a policy economic group representation, he left the Progressive party. He accepted a Liberal nomination in Mackenzie, Sask., and was defeated.

**Tour Broke Up Team**

Seven Austrian Football Players Are Remaining in America

Vienna.—The American tour of the Austrian Hakoah football team, the best players in the country has had a sequel in the disintegration of the team.

"Seven players who cannot be re-engaged have refused to renew their contracts because they have got engagements in America," the club manager announced sadly. "That is the price we have to pay for their fine springing tests."

## Federal Nominations

Winnipeg.—A. A. Heaps, who, along with W. S. Woodworth, represented the Liberal party in the last house, was nominated in the North Winnipeg constituency in the forthcoming federal election, at a meeting of the independent Labor party here.

Brandon, Man.—David W. Beaher, Conservative, to oppose Robert Forke, Progressive.

Nanaimo, B.C.—C. H. O'Halloran, Liberal.

### Smoke This In Your Pipe

Smoke if you will, but be careful where you throw your match, cigar or cigarette stubs or pipe ashes. Careless smokers are a positive menace to property. Forest fires are probably the greatest source of danger. Next come buildings, and the great hazard to growing and harvested crops of grain caused by fire thrown along the roadside.

The personal liberty of smoking has not yet been generally or firmly established, nor is it likely that it will be so attacked for many decades. But no question of personal liberty is involved in the reckless casting aside of the munitions and leavings, because such action directly and seriously affects the other fellow's rights.

### Why Not Longer Lives?

The law of compensation works in the changing habits and modes of life. Although people are having better sanitation, cleaner surroundings, preventive measures for health, more shower baths and fewer flies, there is a negative factor at work in canned and concentrated foods and artificial stimulants of all kinds taken into the body.

If we still lived as our forefathers lived in matters of plain foods and simple habits, such existence, plus the modern standards and methods of hygiene, undoubtedly would produce longevity such as the world has never seen.

A community is judged by the same standards as a band of musicians. Unless there is unity of action, harmony of operation and recognized leadership there will be discord and failure. If they don't like the tune they can call for another, or get into another band, or get up a band of their own. But as long as they stay in they should be willing to play their parts.

If officials would give as much to the church as they do to get elected to office maybe we wouldn't need so many officials.

The name may be appropriate enough, but we doubt whether many people in Charleston really have the ambition to do it.

About the only things that come back to the people from a political campaign are the election returns.

One of our national assets is a neighbor with a good big car and a friendly attitude.

A flower for the dead is not as important as flour for the living.

The greatest jokes are not always on the Fords; they are in them.

Many a bird who thinks he's hard boiled is only half-baked.

We don't need to be so cocky over the decline of the franc and the mark; our nickels won't buy anything either.

"Children or Careers," heads a future article. Bless us, having children is a career!

There'll probably be a shortage of sheep as long as there is a surplus of sheepskins.

WORLD HAPPENINGS  
BRIEFLY TOLD

The man in Reading, England, whose radio loud speaker can be heard by his neighbor will be liable to a fine of \$25.00.

Captain Postelnicu, a Rumanian officer, faces trial by a special court martial because he slapped William S. Culbertson, American minister to Rumania.

Samuel Scott, a pioneer of the west who for many years was associated with the agricultural interests of the country and was a prominent member of the Winnipeg Grain Exchange, is dead.

Detrayers of Vancouver will vote some time next October on the \$1,000,000 bylaw for carrying out the proposed civic centre scheme. The greatest part of the money will be required for expropriation of private property.

Two noted Canadians who had been already appointed privy councillors have been sworn in at the privy council held by His Majesty. They were Hon. Francis Anglin, chief justice of Canada and Rt. Hon. George Perry Graham.

Dick Quilligumston, reputed to be 104 years old, and the oldest Indian in British Columbia, died suddenly at his home on the Esquimalt reserve.

Robert Alexander Baker, well-known advertising man and president of the Baker Advertising Agency, Toronto, is dead.

Twenty-nine persons are dead and four are blind from poison liquor in Buffalo and nearby New York and Eastern Canadian cities. Thirteen of the dead are from Buffalo. The other thirteen died in cities on the Ontario peninsula.

An increase of \$11,143,314.69 on 296.99 per cent. in the net earnings for the first six months of 1926 as compared with the same period of last year is shown in the financial statement of the Canadian National Railways for the period January 1 to June 30, 1926.

Recent dismissal of colored waiters from the Canadian National Railways dining car service was the subject of a protest at a meeting held in Toronto under the joint auspices of the United Negro Improvement Association and the Canadian League for the Advancement of Colored People.

## 60,000 Harvesters Wanted

Army of Harvesters Required to Garner the Crop on Prairies

It is estimated that about 60,000 extra men will be required to garner the harvest in Western Canada this year. The number of men required will be drawn from the provinces of Eastern Canada, British Columbia and the United States. It is understood that Saskatchewan will need 35,000 men; Manitoba, between 8,000 and 9,000; and Alberta about 12,000.

From points both east and west beyond the three prairie provinces of Manitoba, Saskatchewan and Alberta, specially low railway rates will be available to certain central points in Western Canada for those going to work in the harvest fields. Return tickets will be issued at reduced rates to bona fide landlords providing they have worked at least a month on farms in Western Canada.

## Was Original Peter Pan

The Boy Who Never Grew Up Now Best Man at Wedding

"Peter Pan," the boy who never grew up, played quite a grown-up part in the world recently.

Peter Llewelyn Davis, the original of Sir James Barrie's Peter, acted as best man at his brother's wedding in Kent, England. Sir James also attended the ceremony.

"Peter Pan's" brother is Nicholas Llewelyn Davis. He was married to the Honorable Rosamund James, daughter of Lady Northbourne. He is one of Sir James' wards.

The big Medicine Hat plant of the Canadian Western Steel Corporation, which has been idle for some years, has been purchased by the United States Horshoe Manufacturing Company, of Erie, Pennsylvania. The latter is also negotiating for the purchase of Redcliffe Rolling Mills, the equipment of which would be moved to Medicine Hat to enlarge the local plant for iron-rolling process.

## Many Hospital Beds

A hospital census of Canada reveals the fact that there are 25,076 hospital beds in the Dominion. Of this total 5,076 beds are available for maternity patients. The census also shows that there were 35,624 births in hospital in Canada in 1925.

The man who poses as a lion in society is usually a bear at home.

W. N. U. 1840

## Gandhi Would Reform India

Tells What Measures He Would Take If He Were Emperor

"If I were Emperor of India," Mahatma Gandhi, the great Indian Nationalist Idol, states, "I would prohibit the importation of intoxicating liquors and close down every distillery; I would summon the representatives of Hindus and Moslems, strip them of their arms, deprive them of all estates and weapons, and then lock them together in one room and open it only after they had settled their quarrels.

"I would extend the hand of fellowship to the whole world, irrespective of caste, color or creed; I would hand the entire army of occupation in India, retaining only enough police to protect the citizens; I would guarantee full protection to every European as well as all honest European enterprisers. I would give special protection to all forms of religious worship, except that which is repugnant to the moral sense of mankind; I would not bribe the frontier tribes as they are now being bribed, but would cultivate their friendship, and I would impose a prohibitive tariff on all foreign cloth."

## Hearts of Oak

British People Never Stood Higher in Respect and Confidence of the World

The British as a political people never stood higher in the respect and confidence of the world. If they were not steady as rock throughout all the trials and troubles enveloping them in home and foreign and imperial affairs, there would be no hope of stability in Europe, and none of avoiding anarchy in Asia. In that sense we are the keystone of a ponderous arch, and it will be the whole wide structure of the old world would crash.

In the eighth year the Armistice we are still holding firm, despite anxieties, disappointments, crises, not even coming out at a time, but often besetting us from all quarters together in a way that might baffle even the heart and fibres of less bold breed."—J. L. Gairin, in London Observer.

**Manitoba Dairy Industry**

**Growth in Recent Years Has Been Phenomenal**

The growth of the dairy industry in Manitoba was recently summed up by L. A. Gibson, dairy commissioner for the province. In 1912, according to his statement, between 50 and 60 carloads of butter were shipped into Manitoba from Ontario and Quebec. In 1913 imports were 35 carloads and 1,200 carloads. In 1915 Manitoba produced enough butter to meet market requirements and stopped the importation of butter from outside the province 50 carloads.

It has been increasing each year until in 1925 the province had exported 325 carloads, carions valued at 2,500,000.

From points both east and west beyond the three prairie provinces of Manitoba, Saskatchewan and Alberta, specially low railway rates will be available to certain central points in Western Canada for those going to work in the harvest fields. Return tickets will be issued at reduced rates to bona fide landlords providing they have worked at least a month on farms in Western Canada.

**Activity in Building**

**Encouraging State of Conditions in Canada Generally**

Budding was never more active in Western Canada than it is at present. For the first six months of this year the total value of the building permits to be issued has increased by \$8,300,000 compared with total of \$2,412,940 for the similar period in 1924.

This activity in building in Western Canada and also in many other places throughout the Dominion is indicative of the encouraging state of conditions generally in the Dominion. With the prospects for another good grain harvest this year, farmers and business men in Canada are feeling optimistic.

**Women Enter Legal Profession**

Six more women have been called to the bar in London, indicating that an increasing number of them are taking the legal profession as a means of livelihood.

Among the latest to don the wig and gown of the legal bar are the Hon. Ruth Buckley, daughter of Lord Wrenbury, a lord of the appeal, and Miss Beny Hong Lim, of Penang, Straits Settlements. Miss Hong is the second Oriental woman to be called to the bar. Her brother, Kayi Seng Lim, has also been admitted to the practice.

**British Use Dollar Sign**

Dollar signs on goods have appeared for the first time in the shopping districts of London frequent by American tourists. The marks, quite evidently, are London made, as they are very much of the peculiar variety, and lack the original Yankee from tip to toe.

Strange Romantic love Adventures of the Flapper you know  
**Joanna**  
by H. L. GATES  
Copyright 1925 by H. L. GATES

Published by arrangement with First National Pictures, Inc.

**CHAPTER X.—(Continued)** the middle of the night and then I'll Joanna laughed gaily with him. "I know I'm a dumb!"

"Funny things to look forward to, golden evenings, aren't they?" he retorted, looking down at her quizzically.

"I'm sure you, now, getting through the marrying stages fast enough to leave time for an anniversary like that?"

"Oh, I ain't he so quick to get married that I'll be likely to change my mind," Joanna retorted.

"Now that's a sensible response," Kenilworth agreed. She felt his arm tightening a bit. He was holding her closer than Brandon had, almost as close as her own dancing boys customarily did. She began to wonder much about him. She had thought him old, much too old, but he danced with her and talked to her on the level of two teenagers. She was beginning to feel that the evening that most of the men around the tables appeared to be much older than their women. But she reflected, they seemed to be men who had a place in life and, so were more worthwhile than inconsequential young men. And she rather liked the change. Her companion was still talking to her as he swung her deftly in and out among the dancers on the well crowded floor.

"An exquisite flapper like you, and your happy flappy—much more attractive than the old matrons being exclusively worn in one coat lapel. I shouldn't say half the things I really mean if I thought you were adding them up into a matrimonial sum. You'll find life is all too short for that kind of thinking," Brandon said.

"Only a foolish old man," he insisted. "And the obligations won't be on your side, you know. You mustn't forget that it won't be the money. She collected half of at least two million-dollar fortunes already, I'll be bound."

"Mr. Brandon? I don't see what you mean."

"Now you've got me gospilling! Oh, well, we're all new friends. You play as one—against the other. I'm sorry. So you stay with your working. Life is one thing in the world that our charming Yvonne desires, that she hasn't found a way to get, it's Brandon, your banker's nephew. And Brandon undoubtedly will be having a try at you. Because any other woman would handle the situation differently I'm a milie Yvonne will want to take her newest, rival right into her own camp."

He spoke slightly, almost whimsically but Joanna was certain he was serious. And she remembered her impression that the blonde of Yvonne had been more or less pampered and was not too strong. It made another puzzle that baffled her. She tried to catch Kenilworth off his guard.

"Why are you telling me this?" she flung up at him.

He didn't answer her at once, but smiled, quizzically again, and let his eyes roam over her upturned face. The music stopped, and he guided her to the rim of the dance floor, toward an opening between the tables. Still he had not acknowledged her sudden question. She put her hand on his sleeve and stopped him.

"You haven't told me, you know," she reminded him, standing quite still so that he could not evade her again; "Why you warn me against your—both of your friends."

"For perfectly obvious reasons, my dear girl," Kenilworth said, then, meeting her gaze steadily: "I've suddenly decided to have a try at you myself. Brandon plays big games deep, and I think Yvonne plays her deeper

still."

And just now you are the stake. I'm going to play for you, too."

**CHAPTER XI.**

Joanna is invited To Yvonne's. The flush that deepened the hues of Joanna's cheeks, and the wrinkle in her brow, did not escape Yvonne when Kenilworth and the girl returned to the table. Brandon, too, saw, and divided a quick glance between the girl and the man who had been dancing with her. Yvonne, her fluttering eyes on the man's hand.

"He's been making love to you? I knew it. Was I right? Didn't he begin with your eyes?"

Joanna's frown vanished. In the sheer joy of her closeness to the woman whose exotic beauty and fascinating adventures in a world of hectic romance had made her a celebrity, she threw over the mystery which confronted her in each new adventure.

She had been dancing with him, and he had been dancing with her.

"An I supposed to tell?" she purred, appealing to Kenilworth, who was nonchalantly lighting a gold-tipped cigarette. He answered easily:

"Some day, my dear, you will wear your loves like medals on your breast, for your friends to estimate and your rivals to envy. You may as well begin now. I make my confession. I promised to tell you with my adoration. But you must assure the company that it not begin by paying your compliment."

"I have heard," Brandon remarked, "that Roddy never compliments a woman. A dozen of his victims have assured me that he declares his love first and then tells her why. His reasons are, therefore, accepted as being truthful statements of fact, and not flattery. A woman doesn't class what is said of her by a man who is in love with her, as flattery. She believes it to be a just invention of her perfection."

"Clever," Yvonne declared. "I prove that we live always contended—that a man ought to have a style of his own. It's positively tiresome to listen to men go sentimental."

"What weary hours you must spend!" Kenilworth exclaimed. "I promise you complete relaxation if you will take a turn on the floor with me. Miss Manners, here, is dying to ask Brandon to sort of a chap I am, and to ask him who you're planning to marry next."

"A cocktail, first," she demanded. "I prove that we live always contended—that a man ought to have a style of his own. It's positively tiresome to listen to men go sentimental."

"What weary hours you must spend!" Kenilworth exclaimed. "I promise you complete relaxation if you will take a turn on the floor with me. Miss Manners, here, is dying to ask Brandon to sort of a chap I am, and to ask him who you're planning to marry next."

"A cocktail, first," she demanded. "I prove that we live always contended—that a man ought to have a style of his own. It's positively tiresome to listen to men go sentimental."

"What weary hours you must spend!" Kenilworth exclaimed. "I promise you complete relaxation if you will take a turn on the floor with me. Miss Manners, here, is dying to ask Brandon to sort of a chap I am, and to ask him who you're planning to marry next."

## The Study of Stringed Instruments as a Power in Education

(Continued from last week)

An adult pupil after hearing one of the smaller pupils play said to me "Why cannot I play with such ease and charm?" Because, I said, "You try too hard." But how to make the effort without the strain? It is essential to get rid of fear and self consciousness. Easier said than done perhaps. Yes, and the child has the advantage if allowed to follow his own natural way, and if we older ones are careful not to commit the common and trifling blunder of arousing in him fear and self consciousness. Rightly guided he will learn easily to play his instrument and when the time comes for him to face responsibility he will do so without fear, and consequently without strain, and with success.

The next step is with the fingers; After the right position of the hand has been secured, and the right fall of the fingers learned, there comes the necessity for the exercise of another faculty—that of concentration. In the child again, concentration is easy where the interest is deep. Intense concentration is necessary at this stage; concentration in listening for pure intonation. The teacher must keep interest alive and should not let concentration be too long sustained. The very musical child whose ear is keen will concentrate naturally and without conscious effort by sheer force of his interest in true intonation. The habit of playing in tune is acquired without difficulty where concentration is strong enough. The strength of concentration depends on interest and the young pupil learning the necessity of pure intonation will then not lack the necessary incentive to concentration.

Very early the pupil should learn to play at sight. This demands in addition to the above mentioned qualities, quick and exact perception, forethought, determination, and a ready and lively imagination to anticipate the composer's intention and express it.

Playing from memory should also be insisted upon from the earliest pieces. A highly trained memory is of the utmost value to any one engaged in intellectual work, and tends to keep the brain working healthy and easily. To the musician aiming at public performance it is essential, and every student of practical music should have in mind performance—that is, interpretation to an audience—as his definite aim. The purpose of an art is expression of truth as an artist sees it, in other words, the self expression of the artist. The art can be learned only through interpretation, and the pupil should therefore be taught interpretation from the moment he draws the bow across the strings. The early training of the memory with absorbing interest in interpretation of even the simplest of simple pieces will save the young artist from self consciousness, shyness and nervousness in years to come. He will never know their torture and foolishness, for the simple reason that he will have formed the habit of concentration on the thing in hand to the extent of ruling out thoughts of self.

(Continued next week)

## Say It With Flowers

When you require flowers artistically arranged for any occasion, at moderate prices, and of unequalled quality, phone No. 18, THE COLEMAN TRADING CO., LTD. agents for Frache Bros., Lithbridge.

Mr. J. D'Appolonia has been granted the contract for the building of the swimming pool.

## Here and There

The Right Honorable Viscount Kellie Macdonald, attaché to His Imperial Highness, Prince Chichibu, second Prince of Japan, passed through Canada and left Vancouver for Japan where he will spend his vacation with his family. The Viscount will return through Canada to England in the fall.

Fifty-five young fellows who have been prepared for Canadian farming at the British Ministry of Labour centre at Brandon, England, arrived in Canada on the Canadian Pacific S.S. "Empress of France." They came to this country, accompanied by Lt.-Col. G. A. Brinton, under the auspices of the Canadian Government and the C.P.R.

Arrangements have been made to install facilities for supplying both fuel and diesel oil to ocean liners which will dock at the monster new double decker pier "B" and "C" of the Canadian Pacific Railway at Vancouver harbor.

It was announced that eight

canine elevators would be installed on the pier, the elevators being known as Baslow type on the Pacific coast.

262 Certificates were awarded to successful Sleeping and Dining Car employees of the Canadian Pacific Railway for passing their examination in the First Aid Instruction class. The extent to which First Aid instruction among C.P.R. teams is growing is indicated by the fact that the MacAdam, N.B., team recently awarded the Wallace Neff Trophy, in which competition Michigan and Maine also sent contestants.

Definite indications of the largest building year Canada has had in more than a decade are now shown by the record of the first six months of this year. The very large and unusual total of \$194,643,600 worth of new construction for the first half of the year, which also contemplated new work to the value of \$304,598,500 forecasts great activity for the remaining months. During June contracts awarded over June, 1925, of 63 per cent.

Net profits of the Canadian Pacific Railway for the month of May \$2,448,876, compared with \$908,916 the corresponding month of last year, an increase of \$1,540,960, or 170 per cent. Gross earnings for the month are shown at \$15,492,768, an increase of over three millions, when compared with May of last year, and the highest gross shown by the road for any May since 1920. Working expenses for the month under review are shown higher by 1.1 millions.

Two officials whose tenure of office was practically contemporary with the opening of the Canadian Pacific Railway, have recently retired from that company. They are C. J. Flanagan, auditor of freight and telegraph receipts, and J. H. Shearing, auditor of passenger receipts, both were presented with gold watches' specially engraved, while members of their staffs gave to Mr. Flanagan a travelling bag, and to Mr. Shearing a malacca cane with a gold hand engraved with an expression of the esteem of his staff.

Major Thomas Foster of Toronto, and Major Frederic Martin of Montreal, took advantage of the newly inaugurated Canadian Pacific trains "The Rider" and "The York" between their respective cities to exchange letters of greeting. When "The Rider" pulled out of the station at Toronto on its initial run, the engineer carried a letter from Mayor Foster conveying his greetings to Major Martin, who replied the following day in the same manner, but by the "York." Both trains make the run between Toronto and Montreal in eight hours.

Report from the Banff Springs Hotel, and from agents along the line of the Canadian Pacific Railway from Banff to the Pacific Coast received at C.P.R. headquarters, state that the forest fires in the Kootenay Park region at their nearest point are eighty miles distant from the hotel, and that they are nowhere near any of the tracks of the railway. Guests at the hotel have been in no way incommoded by the fires, these are now stated to be well within sight of control. Banff Springs Hotel is at the present time enjoying the busiest season in its history.

## Here and There

Tremendously rapid development of forest and water power resources of the Province of Quebec is indicated in the forecast of revenue totalling \$6,000,000 from these sources for the current year. Last year the same resources produced a revenue of nearly \$4,500,000.

Sixty men from the training camps in Brandon and Clayton, England, have been accepted by the Canadian Government and sailed on the "Empress of France" at the end of June. They proceeded to Winnipeg after landing at Quebec and will be placed on specially selected farms.

Saskatchewan exported last year 77.4 per cent. of its total production of cream butter, according to statement made by the Provincial Dairy Commissioner. The increase in production in 1925 over that of 1920 had amounted to 126.8 per cent., the output last year totalling 15,946,233 pounds.

Close on one hundred pilgrims from St. Paul and Minneapolis passed through Montreal recently on their way to the famous shrine of Ste. Anne de Beaupre, near Quebec. They were the advance guard of the great annual pilgrimage which visits the shrine every year. While stopping off in Montreal they visited the St. Joseph Oratory in that city, also well-known as a shrine.

Hundreds of students and co-eds from Canadian and American universities have been passing through Montreal recently to board ships for Europe in connection with the Overseas Collegiate Tours that have grown increasingly popular of late years. Many of these collegians travel by Canadian Pacific boats, the "Empress of France" on a recent trip carrying over 250 of them.

Clad in gorgous scarlet tunics, partially decorated with gold braid, forty members of the world-famous Coldstream Guards Band, of London, reached Quebec recently on the Canadian Pacific liner "Montcalm" on their third visit to Canada, having been here in 1904 and again in 1911. Under the command of Lieutenant R. G. Evans they will play at Banff, Calgary, Edmonton, Saskatoon, Regina, Vancouver and the Toronto Exhibition.

The electrification of the main line of the Imperial Japanese Government Railway system from Tokio to Shimomosaki, 750 miles, has been long projected, and recently the 46-mile section between Tokio and Odawara has had experimental trains drawn by electric locomotives run twice a day between these points. Owing to the great expense involved it is feared it will be many years before the entire main line can be electrified.

Founded 92 years ago in gardens on the site of which the Canadian Pacific Railway Windsor Station in Montreal now stands, the St. Jean Baptiste Society of that city celebrated that event on June 24th last by having a memorial tablet affixed to the walls of the station. The tablet was the gift of Victor Morin, former president-general of the society, who was present and welcomed it.

Negotiations have been completed for the erection, and work will shortly commence, upon a terminal warehouse and cold storage plant, to cost about five million dollars and to be built in Montreal. It is stated that it will be constructed within ten months from the end of June, will be ten stories in height and will have a total area of 150,000 square feet, of which one-third will be for cold storage. The plant will be built by the Montreal Rail and Harbor Terminal, Limited, and cost will be financed by Municipal Bankers' Corporation of Toronto.

Speaking at the Canadian Daily Newspaper Association meeting at Toronto recently, E. W. Beatty, President of the C.P.R. said there is a class of worker more closely in touch with, or more soundly informed of, the problems of the country and national life than those who served the actual needs of the community. Mr. Beatty was impressed by the universal willingness of the Canadian press to get behind appeals that must be made to the public on behalf of works of charity, civic benefit and education.

Coming from all parts of Great Britain and Ireland twenty-five thoroughbreds were unloaded from the Canadian Pacific liner Metagama when it arrived in Montreal lately. They are for Mulan's breeding, and comprise one stallion, 18 mares and eight geldings. Nellie's Pet, 3-year-old, by Cygnus (Sire of winner of Scottish Derby last year) out of La Lis; and Dentan, two-year-old, who comes of the same breeding as Coronach, winner of this year's English Derby, were among the horses.

Captain Kilroy Harris, lecturer and radio talker in the United States and radio talker in the United States on Australia and New Zealand, recently passed through Montreal on his way to the west where he will take part in the Trail Rides in the Canadian Rockies. He is already possessor of a silver medal for having completed 100 miles of trail rides and hopes this year to earn the gold medal that testifies to the completion of 500 miles riding trials in that district. Capt. Harris is gathering material from Canadian sources for his lectures and radio talks.
